

Important information regarding electricity generation and the environment
AmerenCIPS Environmental Disclosure Statement

The disclosure of this information is required under Section 16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill Adm. Code 421.

Sources of Electricity Supplied for the 12 Months Ending December 31, 2001	Percentage of Total
Biomass power	0%
Coal-fired power	90%
Hydro power	0%
Natural gas-fired power	0%
Nuclear power	0%
Oil-fired power	0%
Solar power	0%
Wind power	0%
Other resources	2%
Unknown resources purchased from other companies	8%
TOTAL	100%

Sources of Electricity Supplied for the 12 Months Ending December 31, 2001

AVERAGE AMOUNTS OF EMISSIONS and AMOUNT OF NUCLEAR WASTE per 1000 kilowatt-hours (kWhs) PRODUCED from KNOWN ⁽¹⁾ Sources for the 12 Months Ending December 31, 2001	
Carbon Dioxide	1,544 lbs.
Nitrogen Oxides	2.53 lbs.
Sulfur Dioxide	7.93 lbs.
High-Level Nuclear Waste	< .0001 lbs.
Low-Level Nuclear Waste	< .0001 cu. feet

⁽¹⁾ 8% of the total electricity supplied was purchased from other suppliers, and the amounts of emissions and nuclear waste attributable to generating this electricity is unknown and not included in this table.

Additional information on companies selling electrical power in Illinois may be found at the Illinois Commerce Commission's World Wide Web site www.icc.state.il.us.

AmerenCIPS and its affiliates demonstrate their environmental sensitivity

through a range of pollution prevention programs, pollution control technology research and installation, and environmental protection initiatives that have reduced air emissions well beyond regulatory requirements.

AmerenEnergy Generating Company, which supplies electricity to AmerenCIPS for resale to its customers, has taken the following actions:

- The company has reduced the combined power plant sulfur dioxide emission rate by more than 59 percent below the 1990 level.
- The company has reduced the combined power plant nitrogen oxide emission rate by more than 53 percent below the 1990 level.

In addition, individual power plants have initiated a number of programs to support the environment:

Newton Power Station. The 1,755-acre Newton Lake in Jasper County, built to provide water for the Newton Power Station, is a paradise for fishermen and naturalists. The lake is stocked with large-mouth bass, channel catfish and several other species. The lake has an 11-mile equestrian trail that is also open for hiking and cross country skiing. A separate trail system is available for mountain biking.

Coffeen Power Station. Built to provide water for Coffeen Power Station in Montgomery County, the 1,100-acre Coffeen Lake is the site of the Coffeen Lake State Fish and Wildlife Area, administered by the Illinois Department of Natural Resources (DNR). The lake offers excellent fishing, boating, hiking and picnic facilities.
